## Data Layers

### Flood Zones

This map layer shows an area's flood zone designation as determined by the Federal Emergency Management Agency (FEMA). A high-risk area has a 1 percent or greater annual chance of flooding and a 26 percent chance of flooding over the life of a 30-year mortgage. High-risk areas are red or orange. The coast areas, shown in purple, are also considered high risk. Green areas are low to moderate risk. A moderate-risk area is between risk limits of a 100-year and 500-year flood. White areas are undetermined, and all other areas are considered no or low risk. For more details on the categories of flood risk, see <https://blog.narrpr.com/support/what-is-the-flood-zone-heat-map/>.
